

InitializationList_Lab2

May 8, 2020

```
In [ ]: #include <iostream>
        #include <assert.h>
        #include <string>
        using std::string;
        using std::cout;

        struct Person {
        public:
            // TODO: Add an initialization list
            Person(const string &n): name(n) {
            }
            string const name;
        };

        // Test
        int main() {
            Person alice("Alice");
            Person bob("Bob");
            assert(alice.name != bob.name);
            cout<<"Done!\n";
        }
```

Compile & Run
