```
In [ ]: #include <assert.h>

        // TODO: Declare a generic, templated average function
        template <typename T>
        T average(T a, T b){
            return (a+b)/2;
        }

        int main() { assert(average(2.0,5.0) == 3.5); }
```

Compile & Run
